Java: Named pipe echo client

```java
try {
// Connect to the pipe
RandomAccessFile pipe = new RandomAccessFile("\\\\.\\pipe\\testpipe", "rw");
String echoText = "Hello word\n";
// write to pipe
pipe.write ( echoText.getBytes() );
// read response
String echoResponse = pipe.readLine();
System.out.println("Response: " + echoResponse );
pipe.close();

} catch (Exception e) {
// TODO Auto-generated catch block
e.printStackTrace();
}
```
